

Bay Friendly Fertilizers

Do not exceed application rates. Bay Friendly Fertilizers are high in "slow release" nitrogen. Remember to: AERATE your soil; TEST for acidity; LIME appropriately; ADD ORGANIC material.

Inorganic Choices

These fertilizers are higher in nitrogen than the organic variety, so only fertilize at a rate of 1 lb of nitrogen per 1000 square feet 4 times a year and keep the first number LOW!!

Sustane® + Nutralene® + Iron 10-2-10

This product is a great choice because the amount of total nitrogen is low and over 80% of the nitrogen contained within is slow-release.

Sustane® + Nutralene® + Polymer Coated Sulfur Coated Urea 18-1-8 plus Iron

This synthetic fertilizer is made from composted turkey litter and amended with other synthetic ingredients. Remember 18% of the product is nitrogen so use it sparingly!

Turf Nurture® 15-4-7 This product is predominantly organic however it has been amended with urea to aid in fast greening. Despite the addition of urea the product contains 75% slow release nitrogen.

Organic Choices

Most organics are a great choice for your lawn! They are low in nitrogen and high in the micronutrients plants need.

OceanGro® 5-5-0 OceanGro is an organic bio-solid fertilizer manufactured in Ocean County, New Jersey that exceeds Environmental Protection Agency Exceptional Quality Standards.

Milorganite® 6-2-0 Milorganite is another bio-solid fertilizer and is available at many home and garden supply stores including the major big box retailers.

TerraCycle Lawn Fertilizer 5-5-1 Worm castings are a great organic choice. TerraCycle, another New Jersey Based company manufactures an excellent version of this product.

Jonathan Green Organic Lawn Fertilizer" 8-3-1 Using the nutritional benefit of kelp, feather, bone and blood meal, mixed with amino and humic acids, this fertilizer is slow release and long lasting.

Jonathan Green Organic Weed Control and Fertilizer" 9-0-0 Corn gluten, the main component of this fertilizer, has been demonstrated to have both weed control properties and adds fertilizer to your lawn.

Fertrell Nitrell® 5-3-4 Designed for lawns, trees, and shrubs.
