

Construction of Replacement Well No. 6 and Replacement of The Water Treatment Plant and Wells Electrical System located at the Borough's Water Treatment Plant for a total of \$4,528,350.00 was financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

The project replaces aging well infrastructure, improves system reliability, and ensures compliance with NJDEP water supply regulations in order to improve water quality, and extend the structure's service life for residents and businesses in the Borough of Lavallette.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
